Jack Anderson’s Review: *Serving Up a Smorgasbord of Choreography*

Anderson argues that a concert at Jacob’s Pillow Dance Festival was “an artistically delectable treat” because of the diversity and assortment of ballet choreography.

**Choreographic Analysis**

- Buoyant
- Joyous leaps and bounds
- Intricate beats
- Groups formed and dissolved with remarkable rapidity
- Quirky shifts of weight and direction
- Complicated lifts and entwinings
- Leaps resembling acts of defiance
Gay Morris’s Review:
*Jacob’s Pillow Dance Festival*

Morris’s review of the festival in 2009 provides a more critical view (acting as a counter argument), but overall states that there were many pleasant surprises within the diverse programming of the concert. She concludes that the festival is a wonderful opportunity for underappreciated choreographers and emerging artists.

Choreographic Analysis

- Sporadically scratching and jerking
- Writhing on the floor
- Highly idiosyncratic
- Repetitive
- Whirling turns
- Torrent of activity
- Radiating energy
- Sculptural, well-constructed
Rogoff concludes that the evening length concert he attended in 2016 had multiple pieces all based and themed around “flight” in their own unique ways. Rogoff said this experience was special and exhilarating because dance can effectively be compared to defying gravity.

Choreographic Analysis

- Bird like miming
- Mechanical airplane formations
- Accelerating tempo
- Infinitesimal leaps
- Suspensions
- Decelerating kicks
- Windmill like
- Counterbalance
